

### **Panoramic View of Sanctuary**

- Please note that picture rail has been installed at mid-window height (76" above chair rail).
- We use the STAS picture hanging system, which has adjustable hooks on clear cords (1 or 2 per picture). Pictures should be wall-ready — with wires, eye hooks or similar. If hooks, opening should be at least 1/4" to fit over STAS hook.
- Art can be hung in four 9'-10' bays on left side; three 9'-10' bays on right side; back left corner (8') is a good place to hang info about the artist and the exhibit, and perhaps one more piece of work.

Sketch of right side of sanctuary with some measurements for scale

\* Picture rail is 76" above the chair rail -- so 76" of vertical display space around the perimeter

White Meeting House display dimensions (not to scale)
